

AODE 4R70W

Precision International is pleased to announce the availability of PI # 37282. This gasket helps seal valve body cross leaks while using the early stiffener plate.

IN 1995 FORD INTRODUCED AN IMPROVED VALVE BODY STIFFENER PLATE TO REDUCE POTENTIAL CROSS LEAKS IN FORWARD AND REVERSE. THIS PLATE RETROFITTED ALL PREVIOUS MODELS. SINCE THIS IMPROVED SERVICE PLATE IS NO LONGER AVAILABLE FROM FORD, WE HAVE DESIGNED THE GASKET TO BE USED WITH THE ORIGINAL 3.5MM THICK PLATE TO PREVENT THE SAME CROSS LEAKS.

CAUTION: DO NOT USE THIS GASKET IF YOUR UNIT IS ALREADY FITTED WITH THE LATE 5 MM PLATE

****Please contact your PI Sales Rep or Distributor for more information****
